

Rahil Nathani, A-CSM, PMP

Technical Project Manager | Data, Cloud & Cybersecurity Delivery

Dallas, Texas | (214) 662-0758 | rahilpmp@gmail.com | linkedin.com/in/rahil-nathani-pmp

Professional Summary

Senior Project/Program Manager and Release Train Leader (PMP, A-CSM) with 13+ years leading complex, cross-functional delivery across financial services, manufacturing, healthcare, and cloud data platforms. 3+ years leading teams of teams in security-adjacent, regulated environments, spanning Cyber Risk Institute (CRI) Profile requirements and vulnerability analysis, IT/OT and IIoT security, and SSO/compliance delivery. Coordinates security, engineering, analytics, and business stakeholders; builds and governs project plans, milestones, RAID logs, and executive status reporting; and drives AI-enabled and agentic initiatives to accountable outcomes in fast-moving, high-visibility programs.

Core Competencies

Program & Portfolio Management | Cyber Risk Institute (CRI) Profile | Vulnerability Analysis & Reporting | Security Operations Coordination | RAID & Dependency Management | Risk Assessment & Mitigation | Executive Status Reporting | Project Governance | Cross-Functional & Teams-of-Teams Leadership | Agentic & AI-Enabled Delivery | Agile / Waterfall / Hybrid Delivery | Data Governance & Compliance | Cloud Data Platform Delivery | Snowflake Ecosystem | SQL Querying and Data Modeling

Technical Enablement

ETL & ELT Cloud Data Lake Migration (Snowflake / Matillion) | AWS Cloud Services | Google Cloud Platform (GCP) | Azure DevOps | CI/CD Pipelines | AI/ML Delivery | Data Warehouse Modernization | Lakehouse Architecture Delivery | System Development Life Cycle (SDLC) | DevSecOps | IIoT & Edge Data | BI & Analytics (Power BI, VS Code, SQL Server) | Cybersecurity Risk Frameworks (CRI Profile, NIST CSF-aligned) | Vulnerability Management & Reporting | Edge & IIoT Security

Work Experience

Contract Signed-NDA | Financial Services

April 2026 - Present

Product Owner & Senior Data Analyst (Enterprise Data Snowflake Delivery)

Dallas, TX

- Lead requirements gathering and backlog delivery for the enterprise division tasked with creating a technology risk management framework, within the Data Services program, translating over 200 control requirements into prioritized, dependency mapped workstreams (do-now / do-next / do-later) and cutting time-to-remediation by half.
- Drive vulnerability analysis and reporting to CRI Profile standards and best practices.
- Coordinated Scrum of Scrums within an Agile Release Train across security, engineering, data, and business (Lending/Retail) Transformation stakeholders, delivering executive dashboards and risk reporting on a PO/PM cadence, aiding leadership decision making and reducing open high/critical findings by 25%.
- Serve as primary delivery point of contact for a major banking client under NDA, aligning cloud data architecture (Snowflake, Lending Transformation migration of 29 features as data sources across 9 Epics, including Salesforce and AI-enabled initiatives) with regulatory compliance, security, and delivery objectives across 3 executive and technical stakeholder groups.
- Manage project plans, milestones, RAID (risks, issues, decisions, dependencies), and status reporting for a \$2.4MM high stakes data and cyber risk program, holding 89% on-time milestone delivery while governing budget to within 6.5% of plan.
- Coordinate cross-functional data engineering, UI/UX, QA, and platform infrastructure teams end-to-end under NDA, validating engineering estimates and ensuring 80% of outputs meet data governance and security standards on first pass.

Evolv Consulting

November 2021 - September 2025

Consulting Client: Toyota Motors North America

December 2022 - June 2025

Sr. Scrum Master, Program Agile Coach | Agile Management Office (AMO)

Plano, TX

- Led a \$125MM OneToyota AI/ML and agentic portfolio, running enterprise risk assessment and RAID tracking (risks, issues, decisions, dependencies) with executive status reporting and roadmap influence, delivering \$500MM+ in business value.
- Developed Lean-Agile adoption across 13 North American manufacturing plants by training teams on Kaizen change (continuous improvement), elevating Machine Reliability availability from 91% to 98% and aligning the Manufacturing Digital Transformation program with T360 strategic business objectives.
- Coordinated cross-functional IIoT delivery across engineering, analytics, and IT/OT security stakeholders, using Jira boards and reports to surface and resolve IT/OT bottlenecks in CI/CD pipelines and prevent downtime across 500+ machines.
- Coached and mentored 8 cross-functional products and teams (29 members) to elevate Agile maturity, implementing best practice checklists for Backlog Refinement and Definition of Done kanban standards for Sprint readiness.
- Guided a Manufacturing Digital Transformation (MDT) IIoT platform spanning Edge deployment and governance, DataOps (MQTT brokering, EDC), and Ignition/Power BI visualization, with cybersecurity as a cross-cutting control layer across the full stack.

- Program-managed multiple teams of teams, including cross-functional embedded pods whose members carried cybersecurity duties, integrating security across edge, data, and analytics workstreams to advance NorthStar IIoT deployments.

Consulting Client: Independent Financial Bank

November 2021 - October 2022

Agile Project Manager | Project Management Office (PMO)

McKinney, TX

- Led cloud data lake modernization of 14 on-premises data sources to Snowflake (Matillion ETL), managing engineering teams to deliver SDLC data sources, products, and models and views such as automated BI reporting (Power BI, SQL Server, Cognos) via CI/CD pipelines on time and below the \$880K brownfield budget.
- Documented 6,000+ User Stories and test case outcomes while coaching the Training department to ready 92 Retail Financial Centers for large-scale new account opening platform, Crescent, using written and verbal skills for internal and external transparent communication.
- Implemented Agile and SAP/ERP process flow best practices to decompose PegaSystems epics and features for Microsoft SSO and API configurations, Wolters Kluwer templates, and DocuSign compliance integrations, leveraging Lean practices to reduce Sprint Planning waste.

Prism Health Lab

April 2020 - October 2021

Scrum Master, Sr. Agile Project Manager | Automation & Digitization

Chicago, IL

- Facilitated Scrum events and requirements for UI/UX priorities with road mapping, greenfield workshops, patient booking optimizations, and clinical documentation enhancements for a healthcare diagnostic platform serving regulated clinical workflows.
- Diagnosed EHR platform technical debt and defects, improving software quality and reliability with an average 6-minute patient throughput from Check-in to Observation.
- Designed COVID-19 vaccine lot tracking systems with advanced analytics data, achieving vial disposal of 2% vs 40% acceptable limit per CDC cold chain specifications.

Ziosk Tabletop Media

July 2017 - September 2018

Product Manager | Customer Success Operations

Dallas, TX

- Led cross-departmental product roadmap meetings for delivery management, reducing digital products' critical paths by 20% and improving overall customer satisfaction.
- Managed 5 Agile development teams and account management of 8 restaurant clients in continuous delivery practices, driving down feature costs while maintaining quality.
- Facilitated UAT demo meetings for clients during initial and post-change requests, mitigating risk by 90% using live, evidence-based management environments.

Brinker International

August 2008 - April 2017

Project Coordinator | Strategic Innovations

Dallas, TX

- Influenced stakeholders with industry research, technical program management, and data analysis across 1,600+ Brinker restaurant locations.
- Implemented RizePoint enterprise intelligence software to automate 33% of processes, coordinating national training sessions using Waterfall methodologies.
- Developed auditing systems that produced advanced data analytics of 8,000+ data points, driving corrective actions across Accounting, QA, Culinary, Facilities, and Engineering departments.

Education & Certifications

Bachelor of Science, Institutional Management | Texas Tech University

May 2014

Advanced Certified Scrum Master (A-CSM) | LeSS Basics CSM | Certified Scrum Master (CSM) | SAFe SSM 5.0 | Project Management Professional (PMP)

Selected Tools

Enterprise: Snowflake | Amazon Web Services (AWS) | Google Cloud Platform | Azure DevOps | Microsoft 365 | Power Apps | SharePoint | Atlassian (Jira, Trello) | GitHub | Slack | Smartsheets

Automation & Data: SQL Server | Power Automate | Power BI | Tableau | Python | ServiceNow | Salesforce | AirTable | VS Code
